Coolant Tending Simplified

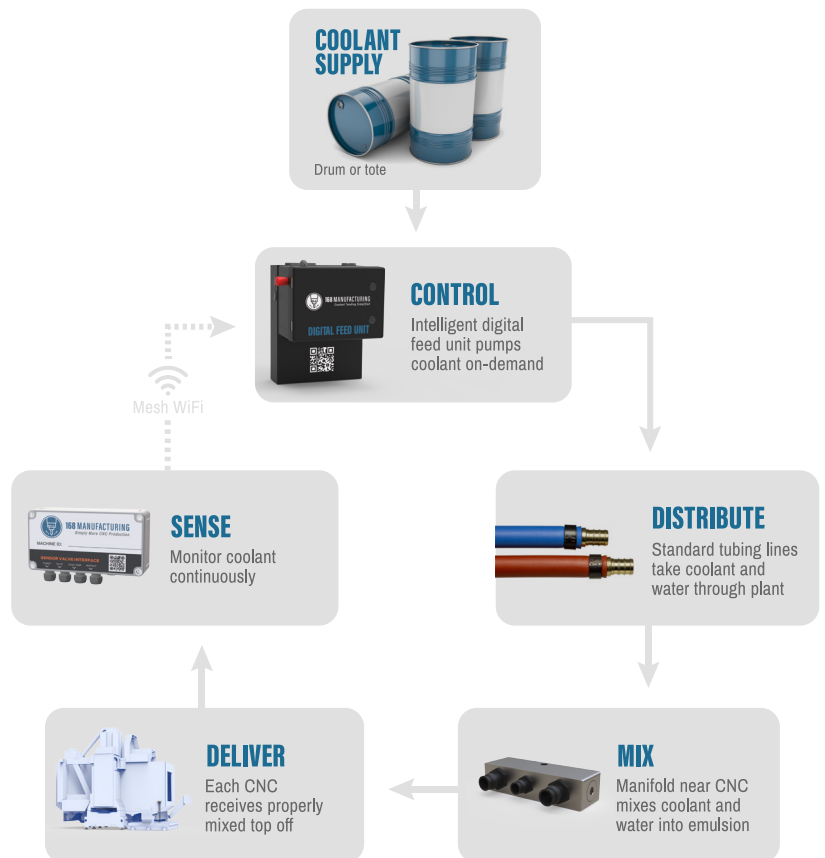

Affordable, Easy-to-Install Coolant Automation

FullShop™ Gen 3 Automated Coolant Management System

Ready to eliminate the constant monitoring, mixing errors and emergency top-offs that are costing you time and money?

FullShop™ Gen 3 is the next generation of coolant automation. Built on years of real-world experience and market feedback, it offers an affordable, easy-to-install solution with modern software, electronics and a new fluid architecture to deliver best-in-class value, performance and simplicity.

Beyond the FullShop™ hardware included in your subscription, all you need is standard tubing from your local plumbing store. No complex installation, no lengthy downtime — just smart coolant automation that works right out of the box. Less to manage, more peace of mind.

FLEXIBLE OPERATION MODES — AVAILABLE TO MIX AND MATCH

CONCENTRATION BY ENTRY (CBE)

Optimizes top-off ratios with user entries. A few refractometer readings per week keeps you dialed in.

CONCENTRATION BY SENSOR (CBS)

Uses third-party refractometer sensors for to collect sump concentration data.

POOR MAN'S KIT (PMK)

Water-only feeding to manually adjusted mixers for unique coolants or testing scenarios.

SENSE

This monitoring-only option offers a pure sensing solution for automated data collection and trend tracking without mixing.

READY TO GET STARTED?

Stop losing money on coolant mistakes and downtime. Experience guaranteed ROI with automated coolant management and configure your FullShop™ Gen 3 subscription today.
